

**Generic Name:** N/A

**Applicable Drugs:** Sublocade (buprenorphine), Brixadi Monthly (buprenorphine), Brixadi Weekly, Vivitrol (naltrexone)

**Preferred:** N/A

**Non-preferred:** N/A

**Date of Origin:** 11/13/2023

**Date Last Reviewed / Revised:** 4/12/2024

## PRIOR AUTHORIZATION CRITERIA

(May be considered medically necessary when criteria I through V are met)

- I. Documented diagnosis meeting DSM criteria of one of the following conditions (A or B) AND must meet medication-specific criteria listed under the applicable diagnosis.
  - A. Opioid Use Disorder (OUD)
    1. Sublocade: Ongoing medically supervised induction involving a minimum of 7 days of treatment with any buprenorphine-containing product.
    2. Brixadi: Ongoing medically supervised induction involving any buprenorphine-containing product.
    3. Vivitrol: Ongoing medically supervised induction involving a minimum of 7 days of opioid abstinence and documented tolerability of oral naltrexone.
  - B. Alcohol Use Disorder (AUD)
    1. Vivitrol: Ongoing medically supervised induction involving a minimum of 7 days of opioid abstinence.
- II. Documentation of A and/or B
  - A. Treatment failure as evidenced by continued high-risk behaviors (substance misuse, diversion) despite adherence with preferred oral agents.
  - B. Outstanding inability to comply with preferred oral agents (e.g., socioeconomic barriers).
- III. Documented review and assessment of electronic prescription monitoring program and medication is indicated for OUD.
- IV. Documented urine drug screen (UDS) at baseline.
- V. Documented patient treatment agreement with prescriber

## EXCLUSION CRITERIA

- Patient self-administration
- Long-acting buprenorphine:
  - Hypersensitivity to buprenorphine
  - Used in combination with methadone
- Long-acting naltrexone:
  - Continued use with opioid analgesics
  - Failed oral naltrexone test
  - Hypersensitivity to naltrexone
- Combination therapy with other long acting injectable opioid partial/antagonist agents

## QUANTITY / DAYS SUPPLY RESTRICTIONS

- Sublocade:
  - Initiation: One 300 mg/1.5 mL prefilled syringe per 28 days for two fills.
  - Maintenance: One 100 mg/0.5 mL prefilled syringe per 28 days.
    - The maintenance dose may be increased to 300 mg monthly for patients who tolerate the 100 mg dose but do not demonstrate a satisfactory clinical response, with documentation of clinical justification.
- Brixadi Monthly: One prefilled syringe (64 mg/0.18 ml, 96 mg/0.27 ml, or 128 mg/0.36 ml) per 28 days.
- Brixadi Weekly: One prefilled syringe (8 mg/0.16 mL, 16 mg/0.32 mL, 24 mg/0.48 mL, or 32 mg/0.64 mL per 7 days.
- Vivitrol: One 380 mg/ 5 mL vial per 28 days.

## APPROVAL LENGTH

- **Authorization:** 6 months.
- **Re-Authorization:** 6 months: An updated letter of medical necessity or progress notes showing that current medical necessity criteria are met, documentation the patient has had at least two urine drug screens in the past 120 days, the patient is adherent with therapy, and the medication is effective.

## APPENDIX

Table 1  
Equivalent Dosages with Buprenorphine SL and Brixadi

Daily Dose of Sublingual Buprenorphine	Brixadi (Weekly)	Brixadi (Monthly)
≤ 6 mg	8 mg	--
8-10 mg	16 mg	64 mg
12-16 mg	24 mg	96 mg
18-24 mg	32 mg	128 mg
